

# Fentanyl Clandestine Lab Precursors

Some precursors that may be observed associated to a clandestine drug lab producing Fentanyl are:

- Anilin
- 1-Benzyl-4-piperidone
- 2-Chloroethylbenzene
- Methyl acrylate
- Phenethylamine
- *N*-(1-phenethyl)-piperidin-4-one
- 2-phenyl-1-bromoethane
- *N*-(4-piperidiny)aniline
- Propionic anhydride
- Propionyl chloride
- *N*-(1-phenethyl-4-piperidiny)aniline
